**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I've been with Sonic.net since 2009. Their service and support have been excellent and currently use their DSL unbundled internet and phone service. I use the internet part a lot more than the phone service.

I am disabled and receive one monthly check so I have a limited income source. Sonic fiber is out of my league right now but I do plan on upgrading to fiber as soon as I can.

I hope my service I now have with Sonic doesn't start costing more too soon as Sonic has only raised my rates only once since using them. It's all the other fees and taxes they have to add on is where the costs have been steadily increased through the years.

I have mobility issues and I use my broadband for lots of things like shopping, some banking, a little entertainment, research and education and communications like I'm doing here. Internet radio is the bomb too.

I look forwards to using my internet access every morning to start my day with so I'd appreciate if it doesn't turn into what cable TV turned into. Satellite service is out of the question for me because I live in an apartment complex. I don't even have a television and rather not have to purchase one.
